

REACH STATEMENT

PERSPEX® CAST ACRYLIC SHEET

REACH COMPLIANCE OF PERSPEX INTERNATIONAL LIMITED CAST ACRYLIC SHEET PRODUCTS

The EU REACH Regulation (Regulation No. 1907/2006) requires that substances manufactured or imported to the EU in quantities of one tonne or more per year are registered. The above products are classified as articles under REACH. They do not contain substances intended to be released and hence are not subject to REACH registration.

We have also completed a review of our raw materials against the current candidate list of substances of very high concern (SVHC), as published on the ECHA website on the 23rd of January 2024. Whilst this list is continually subject to review, to our current knowledge none of these products contain any of these substances at levels which need to be declared. Perspex International Limited will continue to monitor this situation and inform customers of any changes or developments.

Perspex International Limited is positioned well to respond to REACH and has undertaken an extensive process to ensure that the implementation of the REACH regulation will have no negative impact on our product range.

If you should have any further questions, or would like any additional information concerning Perspex International Limited materials contained within the products you manufacture or supply, please do not hesitate to discuss these with your local sales and customer service representatives or contact us via the e-mail address below.

Yours sincerely

Glenn Apsey
