Subject: REACH Regulation

Dear Madam, dear Sir,

Following your request, please find hereby our position concerning the REACH regulation for the products in Polypropylene:

The products we deliver to your company are considered as articles. Therefore, they are not subject to registration. However, our suppliers have confirmed that the substances present in the preparation they deliver to us have been registered.

A candidate list of substances of very high concern (SVHC) has been published by the European Chemical Agency (ECHA). Today, this list contains **235 Substances (after update from June 14<sup>th</sup> 2023)**.

We confirm that the raw materials that enter in the composition of the articles we deliver to your company do not contain more than 0.1 % of any substances of this list.

However, since we do not perform specific tests to verify the potential presence of SVHC in our articles, we cannot guarantee that there is no trace amount of some SVHC as impurity or otherwise in our articles.

We also confirm that we follow the evolution of the candidate list and that we will inform you as soon as a substance present in this list will be present at more than 0.1% in the articles we deliver to your company.

We stay at your disposal for any further information.

Best regards

Yves Klinger
